Correct tooth position is an important factor for esthetics function and for overall preservation or restoration of dental health. Many individuals would like to have the benefits offered by high quality orthodontic treatment but do not want to have braces that are visible to their friends and colleagues. Invisible lingual orthodontics represents the only solution that does not impair the patient from an esthetic point of view. Many patients if given the choice opt for it. About the Author: Dr. Rohan Zope has obtained MDS degree in Orthodontics and Dentofacial Orthopedics from Maharashtra University of Health Sciences in 2012. He has established himself as a Consulting Orthodontist and has many publications to his credit.
